12.5MW cogen captive power plant

The Company has invested in setting up a 12.5 MW thermal (coal based) captive co- generation power plant at its bed linen manufacturing facility located at the Hassan SEZ.

In the first phase, the Company has successfully commissioned with effect from January 15, 2010, Boiler – I, which will ensure power generation of 6.25 MW along with the requisite requirement of steam.

The second boiler is expected to be commissioned in March, 2010, which will take the total power generation to 12.5 MW.
